

Admin users

Admin users can:

1. Manage user accounts, except their own and other admins' accounts.
2. Manage roles.
3. Manage user groups.
4. Manage e-mail notification settings.
5. Browse users' activity logs.
6. Manage metadata settings.

When configuring the admin's permissions, you can choose:

1. What administrative section is he allowed to access.
2. Which groups of users he can see and manage.
3. Whether he will be able to define the path of the users' home folder, or if he will be limited to a specified folder.
